**To : Sam Adukiewicz**

**From: David Hawthorne**

**Subject: Testimonial Pump Out USA work boat**

**Mr. Adukiewicz I am writing you this letter under a request from Dan Martin who has asked me to say a little about the Pump out vessel we purchased in 2004 and are currently using to date. Considering we have had other platforms for running our mobile pump out operations from,**

**I consider the Pump Out USA vessel to be the most user friendly and comfortable vessel we have ever had at this facility. The vessels deck is at the perfect height for operational use and provides the much needed safety features to protect your crew from the ever un-predictable safety hazards of working on the water. The vessel is very durable and the sewer equipment provided with the vessel is state of the art and will provide years of service.**

**There are many vessels in the market for this type of service, The Pump Out USA vessel is high on the list for us because of past use and new features offered in this years model.**

**In ending, I consider the Pump Out USA vessel to be a good choice for a work vessel. This facility will be purchasing 2 new vessels for 2010 fiscal year.**

**Sincerely,**

A handwritten signature in black ink, appearing to read "D. Hawthorne", is written over the word "Sincerely,".
